Usually at this time of year, a lot of companies expect a lull in customer traffic, or a slight drop in sales. It's to be expected, when a busy summer city like Penticton sees tourism drop off, and life returns to normal. Well, in the case of Heritage Millwork, we're still rolling. With no foreseeable drop off in sight, we expect to roll right into the new year as busy as ever. We would like to credit this to the diligent efforts made by our dealers. All over the province, sales remain strong with blossoming markets in nearly every region.

We would also like to remind our dealers that we are a custom window and door shop. If you find yourself with inconceivable projects, give us a shot, we do a lot more than you may think.

Hybrid Windows

Have you ever wanted to have wood windows in your home, but never had the cash to make such an investment? Well now you can achieve that look without spending the money. Using stain grade fir for a brickmould, as well as an interior liner, with a natural wood finish applied to a beige vinyl window creates quite an appealing product. Now you have achieved the wood look, with the vinyl cost. All standard glass options apply, including lo E, argon, and different types of obscured glass. **Call us today for a quote!**
